

# MEC221 Mechanics of Materials

**School:** School of Science, Technology and Engineering

2026 | Trimester 1

UniSC Sunshine Coast  
UniSC Moreton Bay

**BLENDED  
LEARNING**

Most of your course is on campus but you may be able to do some components of this course online.

*Please go to [unisc.edu.au](http://unisc.edu.au) for up to date information on the teaching sessions and campuses where this course is usually offered.*

## 1. What is this course about?

### 1.1. Description

In Mechanics of Materials you will learn how to analyse and design structures and calculate the allowable design loads and stresses within their members. Mechanics of Materials is a branch of mechanics that studies the relationships between the external loads applied to a deformable body and the intensity of the internal forces, and resulting stresses acting within the body.

### 1.2. How will this course be delivered?

ACTIVITY	HOURS	BEGINNING WEEK	FREQUENCY
<b>BLENDED LEARNING</b>			
<b>Learning materials</b> – Asynchronous learning material	2.5hrs	Week 1	12 times
<b>Tutorial/Workshop 1</b> – Tutorial - on-campus only	2hrs	Week 1	12 times
<b>Laboratory 1</b> – Workshop - on-campus only	2hrs	Week 1	12 times

### 1.3. Course Topics

Topics may include:

- Moment of Inertia
- Shear Force and Bending Moment Diagrams
- Normal Stress and Strain
- Shear Stress and Strain
- Statically Indeterminate Axially Loaded Members
- Torsion
- Stress and Strain Transformations
- Bending and Shear Stresses in Beams
- Column Buckling
- Combined Loading

## 2. What level is this course?

200 Level (Developing)

Building on and expanding the scope of introductory knowledge and skills, developing breadth or depth and applying knowledge and skills in a new context. May require pre-requisites where discipline specific introductory knowledge or skills is necessary. Normally, undertaken in the second or third full-time year of an undergraduate programs.

## 3. What is the unit value of this course?

12 units

## 4. How does this course contribute to my learning?

COURSE LEARNING OUTCOMES	GRADUATE QUALITIES MAPPING	PROFESSIONAL STANDARD MAPPING *
On successful completion of this course, you should be able to...	Completing these tasks successfully will contribute to you becoming...	Engineers Australia Stage 1 Professional Engineer Competency Standards
1 Explain the relationship between the external forces acting on a structure and the resulting internal stresses in its members	Knowledgeable	1, 2, 2.2.b, 2.2
2 Justify the effects of combined loading on beam sections	Creative and critical thinker	2, 2.1.c, 2.1
3 Perform laboratory experiments to observe the behaviour of structural members under given conditions and conduct theoretical and comparative analyses to solve stress/strain analysis problems.	Empowered	2, 2.2.f, 2.2
4 Interpret experimental and test results and present these in an appropriate engineering report format	Creative and critical thinker Engaged	2, 2.2, 3, 3.5
5 Collaborate with others in a team project environment to conduct engineering investigations and produce engineering reports	Engaged	3, 3.5, 3.6

### \* Competencies by Professional Body

CODE	COMPETENCY
<b>ENGINEERS AUSTRALIA STAGE 1 PROFESSIONAL ENGINEER COMPETENCY STANDARDS</b>	
1	Elements of competency: Knowledge and Skill Base
2	Elements of competency: Engineering Application Ability
2.2.b	Engineering Application Ability - Fluent application of engineering techniques, tools and resources: Constructs or selects and applies from a qualitative description of a phenomenon, process, system, component or device a mathematical, physical or computational model based on fundamental scientific principles and justifiable simplifying assumptions.
2.1.c	Engineering Application Ability - Application of established engineering methods to complex engineering problem solving: Competently addresses complex engineering problems which involve uncertainty, ambiguity, imprecise information and wide-ranging and sometimes conflicting technical and non-technical factors.
2.2.f	Engineering Application Ability - Fluent application of engineering techniques, tools and resources: Designs and conducts experiments, analyses and interprets result data and formulates reliable conclusions.
2.1	Engineering Application Ability: Application of established engineering methods to complex engineering problem solving.
2.2	Engineering Application Ability: Fluent application of engineering techniques, tools and resources.
3	Elements of competency: Professional and Personal Attributes

CODE	COMPETENCY
3.5	Professional and Personal Attributes: Orderly management of self, and professional conduct.
3.6	Professional and Personal Attributes: Effective team membership and team leadership.

## 5. Am I eligible to enrol in this course?

Refer to the [UniSC Glossary of terms](#) for definitions of “pre-requisites, co-requisites and anti-requisites”.

### 5.1. Pre-requisites

ENG102 or ENG105

### 5.2. Co-requisites

Not applicable

### 5.3. Anti-requisites

ENG221

### 5.4. Specific assumed prior knowledge and skills (where applicable)

Not applicable

### 5.5. Microcredential Information

Not applicable

## 6. How am I going to be assessed?

### 6.1. Grading Scale

Standard Grading (GRD)

High Distinction (HD), Distinction (DN), Credit (CR), Pass (PS), Fail (FL).

### 6.2. Details of early feedback on progress

The engagement in weekly formative tutorial exercises will demonstrate the level of proficiency and understanding of the course material

### 6.3. Assessment tasks

DELIVERY MODE	TASK NO.	ASSESSMENT PRODUCT	INDIVIDUAL OR GROUP	WEIGHTING %	WHAT IS THE DURATION / LENGTH?	WHEN SHOULD I SUBMIT?	WHERE SHOULD I SUBMIT IT?
All	1a	Written Piece	Individual	8%	This assignment would, on average, require 2 hours of independent effort.	Week 4	Online Submission
All	1b	Written Piece	Individual	10%	This assignment would, on average, require 3 hours of independent effort.	Week 8	Online Submission
All	1c	Written Piece	Individual	12%	This assignment would, on average, require 4 hours of independent effort	Week 12	Online Submission
All	2	Portfolio	Group	30%	Project portfolio comprising of workshop practical and design reports (maximum of a 10 page portfolio + appropriate diagrams )	Week 12	Online Submission
All	3	Examination - Centrally Scheduled	Individual	40%	2 hrs	Exam Period	Online Submission

**All - Assessment Task 1a:** Assignment 1

<b>GOAL:</b>	These assignments allow you to demonstrate your understanding of the theory and also enable you to identify any problem areas in your understanding							
<b>PRODUCT:</b>	Written Piece							
<b>AUTHORSHIP STATEMENT:</b>								
<b>FORMAT:</b>	Questions will be set for each of the assignments, from the material covered in the on-line learning resources and tutorials up to and including the week of the submission. You are required to use the theory introduced in the online learning resources to solve the assignment questions. The assignments will be provided to you on CANVAS on the Wednesday of the week preceding the submission date. Assignment solutions must be hand-written, showing all working and calculations. You must scan and submit your assignment online (Instructions will be provided on CANVAS). Solutions produced in WORD or EXCEL will NOT be accepted							
<b>CRITERIA:</b>	<table border="1"> <thead> <tr> <th>No.</th> <th></th> <th>Learning Outcome assessed</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Correct answers to the problems using appropriate theory and methodology showing a logical sequence to the problem solution.</td> <td>1</td> </tr> </tbody> </table>	No.		Learning Outcome assessed	1	Correct answers to the problems using appropriate theory and methodology showing a logical sequence to the problem solution.	1	
No.		Learning Outcome assessed						
1	Correct answers to the problems using appropriate theory and methodology showing a logical sequence to the problem solution.	1						
<b>GENERIC SKILLS:</b>								

**All - Assessment Task 1b:** Assignment 2

<b>GOAL:</b>	These assignments allow you to demonstrate your understanding of the theory and also enable you to identify any problem areas in your understanding													
<b>PRODUCT:</b>	Written Piece													
<b>AUTHORSHIP STATEMENT:</b>														
<b>FORMAT:</b>	Questions will be set for each of the assignments, from the material covered in the on-line learning resources and tutorials up to and including the week of the submission. <b>GENERIC SKILLS:</b>														

**All - Assessment Task 2:** Workshop Project Portfolio

<b>GOAL:</b>	As an engineer, you will be required to apply theory to practical engineering problems. In this task you will design, build and test a structural component, interpret experimental and test results, undertake an analytical evaluation and design of a device, and present these in an appropriate engineering report format. During these workshop tasks, you will develop and advance your skills and understanding of materials engineering theory, and work towards meeting your Engineers Australia competencies.																
<b>PRODUCT:</b>	Portfolio																
<b>AUTHORSHIP STATEMENT:</b>																	
<b>FORMAT:</b>	Working in a group of 4 students, you will produce a Workshop Project portfolio of all the individual practical exercises. The portfolio should NOT be longer than 10 pages. More information on the tasks and the structure of the reports will be provided on CANVAS.																
<b>CRITERIA:</b>	<table border="1"> <thead> <tr> <th>No.</th> <th></th> <th>Learning Outcome assessed</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>The effective design, build and testing of a balsawood bridge as per the project brief.</td> <td>2</td> </tr> <tr> <td>2</td> <td>Performance in laboratory experiments to observe the behaviour of structural members under given conditions and conduct theoretical and comparative analyses to solve stress/strain analysis problems.</td> <td>3</td> </tr> <tr> <td>3</td> <td>Interpretation of experimental and test results and present these in an appropriate engineering report format</td> <td>4</td> </tr> <tr> <td>4</td> <td>Collaboration with others in a team project environment to conduct engineering investigations.</td> <td>5</td> </tr> </tbody> </table>	No.		Learning Outcome assessed	1	The effective design, build and testing of a balsawood bridge as per the project brief.	2	2	Performance in laboratory experiments to observe the behaviour of structural members under given conditions and conduct theoretical and comparative analyses to solve stress/strain analysis problems.	3	3	Interpretation of experimental and test results and present these in an appropriate engineering report format	4	4	Collaboration with others in a team project environment to conduct engineering investigations.	5	
No.		Learning Outcome assessed															
1	The effective design, build and testing of a balsawood bridge as per the project brief.	2															
2	Performance in laboratory experiments to observe the behaviour of structural members under given conditions and conduct theoretical and comparative analyses to solve stress/strain analysis problems.	3															
3	Interpretation of experimental and test results and present these in an appropriate engineering report format	4															
4	Collaboration with others in a team project environment to conduct engineering investigations.	5															
<b>GENERIC SKILLS:</b>	Collaboration, Problem solving, Organisation, Applying technologies, Information literacy																

### All - Assessment Task 3: Final Examination

<b>GOAL:</b>	Demonstrate your understanding of all theory of this course by answering problems during a time constrained on-line examination.									
<b>PRODUCT:</b>	Examination - Centrally Scheduled									
<b>AUTHORSHIP STATEMENT:</b>										
<b>FORMAT:</b>	The on-line final exam will assess your understanding of the course content as presented in the on-line learning resources. The duration of the final exam will be 2 hours (during centrally scheduled exam period). You will be required to solve a number of typical Mechanics of Materials problems similar to those given in the tutorial and assignment questions throughout the trimester.									
<b>CRITERIA:</b>	<table border="1"><thead><tr><th>No.</th><th></th><th>Learning Outcome assessed</th></tr></thead><tbody><tr><td>1</td><td>Correct answers to the problems using appropriate theory and methodology showing a logical sequence to the problem solution</td><td>1</td></tr><tr><td>2</td><td>Demonstrated understanding through use of correct formulae</td><td></td></tr></tbody></table>	No.		Learning Outcome assessed	1	Correct answers to the problems using appropriate theory and methodology showing a logical sequence to the problem solution	1	2	Demonstrated understanding through use of correct formulae	
No.		Learning Outcome assessed								
1	Correct answers to the problems using appropriate theory and methodology showing a logical sequence to the problem solution	1								
2	Demonstrated understanding through use of correct formulae									
<b>GENERIC SKILLS:</b>	Communication, Problem solving, Organisation, Applying technologies, Information literacy									

## 7. Directed study hours

A 12-unit course will have total of 150 learning hours which will include directed study hours (including online if required), self-directed learning and completion of assessable tasks. Student workload is calculated at 12.5 learning hours per one unit.

## 7.1. Schedule

PERIOD AND TOPIC	ACTIVITIES
Week 1 Introduction, Revision of Centroid and Moment of Inertia	Engage with on-line learning resources and undertake tutorial exercises (problem solving) Revise ENG102 Engineering Statics Course topics, Workshop Project 1 (Bridge Project)
Week 2 Normal Stress and Strain; Shear Stress and Strain	Engage with on-line learning resources, Workshop project 1 (Bridge Project), tutorial exercise, and revision examples
Week 3 Stress and Strain in Axially-loaded members	Engage with on-line learning resources, Workshop project 1 (Bridge Project), tutorial exercise, and revision examples
Week 4 Statically Indeterminate Axially Loaded Members	Engage with on-line learning resources, Workshop project 1 (Bridge Project), tutorial exercise, and revision examples.
Week 5 Torsion	Engage with on-line learning resources, Workshop project 1 (Bridge Testing), tutorial exercise, and revision examples.
Week 6 Buckling	Engage with on-line learning resources, Workshop Project 2 (Beam Deflection), tutorial exercise, and revision examples.
Week 7 Shear Force and Bending Moment Diagrams	Engage with on-line learning resources, Workshop Project 2 (Beam Deflection), tutorial exercise, and revision examples.
Week 8 Beam Bending – symmetrical	Engage with on-line learning resources, Workshop Project 2 (Column Buckling / Bending of Beams), tutorial exercise, and revision examples.
Week 9 Beam Bending unsymmetrical	Engage with on-line learning resources, Workshop Project 2 (Column Buckling / Bending of Beams), tutorial exercise, and revision examples.
Week 10 Shear Stress in Beams	Engage with on-line learning resources, Workshop Project 4 (Design), tutorial exercise, and revision examples.
Week 11 Combined Loadings	Engage with on-line learning resources, Workshop Project 4 (Design), tutorial exercise, and revision examples.
Week 12 Stress Transformations	Engage with on-line learning resources, Workshop Project 4 (Design), tutorial exercise, and revision examples.
Week 13 Strain Transformations	Engage with on-line learning resources, Workshop Project 4 (Design), tutorial exercise, and revision examples.

## 8. What resources do I need to undertake this course?

Please note: Course information, including specific information of recommended readings, learning activities, resources, weekly readings, etc. are available on the course Canvas site– Please log in as soon as possible.

### 8.1. Prescribed text(s) or course reader

You need regular access to the resource(s) below. Many texts are available as ebooks through the [Library](#) at no additional cost.

REQUIRED?	AUTHOR	YEAR	TITLE	EDITION	PUBLISHER
Recommended	Russell C. Hibbeler	0	Mechanics of Materials in SI Units	10th Ed	n/a

### 8.2. Specific requirements

Fully enclosed shoes must be worn in the engineering laboratory. If you do not have the correct shoes you will not be allowed to do the practical. You must also undertake the laboratory induction before you can undertake any practical.

## 9. How are risks managed in this course?

Risk assessments have been performed for all studio and laboratory classes and a low level of health and safety risk exists. Some risk concerns may include equipment, instruments, and tools; as well as manual handling items within the laboratory. It is your responsibility to review course material, search online, discuss with lecturers and peers and understand the risks associated with your specific course of study and to familiarise yourself with the University's general health and safety principles by reviewing the [online induction training for students](#), and following the instructions of the University staff.

## 10. What administrative information is relevant to this course?

### 10.1. Assessment: Academic Integrity

Academic integrity is the ethical standard of university participation. It ensures that students graduate as a result of proving they are competent in their discipline. This is integral in maintaining the value of academic qualifications. Each industry has expectations and standards of the skills and knowledge within that discipline and these are reflected in assessment.

Academic integrity means that you do not engage in any activity that is considered to be academic fraud; including plagiarism, collusion or outsourcing any part of any assessment item to any other person. You are expected to be honest and ethical by completing all work yourself and indicating in your work which ideas and information were developed by you and which were taken from others. You cannot provide your assessment work to others. You are also expected to provide evidence of wide and critical reading, usually by using appropriate academic references.

In order to minimise incidents of academic fraud, this course may require that some of its assessment tasks, when submitted to Canvas, are electronically checked through Turnitin. This software allows for text comparisons to be made between your submitted assessment item and all other work to which Turnitin has access.

### 10.2. Assessment: Additional Requirements

#### **Eligibility for Supplementary Assessment**

Your eligibility for supplementary assessment in a course is dependent of the following conditions applying:

- (a) The final mark is in the percentage range 47% to 49.4%; and
- (b) The course is graded using the Standard Grading scale

Eligibility for Supplementary Assessment Your eligibility for supplementary assessment in a course is dependent of the following conditions applying: The final mark is in the percentage range 47% to 49.4% The course is graded using the Standard Grading scale You have not failed an assessment task in the course due to academic misconduct.

### 10.3. Assessment: Submission penalties

Late submissions may be penalised up to and including the following maximum percentage of the assessment task's identified value, with weekdays and weekends included in the calculation of days late:

- (a) One day: deduct 5%;
- (b) Two days: deduct 10%;
- (c) Three days: deduct 20%;
- (d) Four days: deduct 40%;
- (e) Five days: deduct 60%;
- (f) Six days: deduct 80%;
- (g) Seven days: A result of zero is awarded for the assessment task.

The following penalties will apply for a late submission for an online examination:

- Less than 15 minutes: No penalty
- From 15 minutes to 30 minutes: 20% penalty
- More than 30 minutes: 100% penalty

### 10.4. Links to relevant University policy and procedures

For more information on Academic Learning & Teaching categories including:

- Assessment: Courses and Coursework Programs
- Review of Assessment and Final Grades
- Supplementary Assessment
- Central Examinations
- Deferred Examinations
- Student Conduct
- Students with a Disability

For more information, visit <https://www.usc.edu.au/explore/policies-and-procedures#academic-learning-and-teaching>

### 10.5. Student Charter

UniSC is committed to excellence in teaching, research and engagement in an environment that is inclusive, inspiring, safe and respectful. The [Student Charter](#) sets out what students can expect from the University, and what in turn is expected of students, to achieve these outcomes.

## 10.6. General Enquiries

For course-specific questions, contact your teaching staff or Course Coordinator.

For other enquiries or to access support, please contact Student Central:

- [UniSC Student Central](#)
- [UniSC Adelaide Student Central](#)
