## 1. What is this course about?

### 1.1. Description

Psychology is a broad discipline, spanning from patient-focussed therapy to how the brain gives rise to the mind. Psychological knowledge is acquired through the rigorous application of the scientific method. In order to be a psychologist, we must understand how this knowledge base has been developed and refined using the tools of science. This course therefore introduces the principles of scientific research, delves into experimental design, and introduces statistical techniques to describe and evaluate the results of psychological investigations.

### 1.2. How will this course be delivered?

ACTIVITY	HOURS	BEGINNING WEEK	FREQUENCY
<b>BLENDED LEARNING</b>			
<b>Learning materials</b> – Online learning materials and activities	1hr	Week 1	13 times
<b>Tutorial/Workshop 1</b> – In person classes with lecturer presenting weekly module with a chance for students to ask questions.	2hrs	Week 1	13 times
<b>Tutorial/Workshop 2</b> – Activity-based workshops	1hr	Week 2	10 times

### 1.3. Course Topics

This course is an introductory level course to principles of science, research design, methodology and analyses in the context of the psychological sciences. Topics covered include: the scientific method, measurement, descriptive statistics, correlations, inferential statistics, types of research, null hypothesis significance testing, statistical significance, and communication.

## 2. What level is this course?

100 Level (Introductory)

Engaging with discipline knowledge and skills at foundational level, broad application of knowledge and skills in familiar contexts and with support. Limited or no prerequisites. Normally, associated with the first full-time study year of an undergraduate program.

## 3. What is the unit value of this course?

### All - Assessment Task 1: Weekly Quiz

<b>GOAL:</b>	<p>Weekly quizzes are multiple choice questions related to each week's learning module. These quizzes are designed to test and consolidate the critical concepts of each week.</p> <p>There will be 13 quizzes, but only the best 10 weeks' scores will count toward each student's grade for this assessment. There will therefore be no extensions or supplementary options for this assessment (i.e. students can "miss" 3 out of 13 quizzes with no loss of marks).</p>						
<b>PRODUCT:</b>	Quiz/zes						
<b>FORMAT:</b>	This assessment task requires you to complete a series of multiple-choice questions via Canvas. There'll be a quiz each week that will be due within three days of the week's lecture. When lectures are disrupted by e.g. public holidays, the week's quiz will be due within three days of a time to be specified at the start of semester.

<b>GENERIC SKILLS:</b>	Problem solving						

### All - Assessment Task 2: Mid-semester quiz

<b>GOAL:</b>	The aim of the mid-semester quiz is for students to consolidate and apply the knowledge of course content up to the week of the quiz.						
<b>PRODUCT:</b>	Quiz/zes						
<b>FORMAT:</b>	This assessment task requires you to complete a series of multiple-choice questions via Canvas. The quiz will be open for one week, and will be due between Weeks 4 - 8 (refer to format for quiz timing).

<b>GENERIC SKILLS:</b>	Problem solving						

### All - Assessment Task 3: Reporting results in a research report

<b>GOAL:</b>	The goal of this task is to develop hypotheses, analyse datasets to test those hypotheses, and to communicate the findings through a formal report that follows the format of a Results section of a psychology research report.												
<b>PRODUCT:</b>	Report												
<b>FORMAT:</b>	This assessment task will be due between Weeks 8 - 13. The report will be an APA 7th formatted results section that summarises multiple stages of research performed throughout the semester. Calculations and supplementary information will be included in an Appendix, which must also follow APA 7th formatting. A more detailed outline of the requirements of this assessment will be provided on Canvas.												
<b>CRITERIA:</b>	<table border="1"><thead><tr><th>No.</th><th></th><th>Learning Outcome assessed</th></tr></thead><tbody><tr><td>1</td><td>Informative and concise summary of the skills demonstrated</td><td>3</td></tr><tr><td>2</td><td>Informative and concise summary of the analysis</td><td>4</td></tr><tr><td>3</td><td>Careful and accurate use of APA referencing and style and use of formal, academic language</td><td>4</td></tr></tbody></table>	No.		Learning Outcome assessed	1	Informative and concise summary of the skills demonstrated	3	2	Informative and concise summary of the analysis	4	3	Careful and accurate use of APA referencing and style and use of formal, academic language	4

## 9. How are risks managed in this course?

Health and safety risks for this course have been assessed as low. It is your responsibility to review course material, search online, discuss with lecturers and peers and understand the health and safety risks associated with your specific course of study and to familiarise yourself with the University's general health and safety principles by reviewing the [online induction training for students](#), and following the instructions of the University staff.

## 10. What administrative information is relevant to this course?

### 10.1. Assessment: Academic Integrity

Academic integrity is the ethical standard of university participation. It ensures that students graduate as a result of proving they are competent in their discipline. This is integral in maintaining the value of academic qualifications. Each industry has expectations and standards of the skills and knowledge within that discipline and these are reflected in assessment.

Academic integrity means that you do not engage in any activity that is considered to be academic fraud; including plagiarism, collusion or outsourcing any part of any assessment item to any other person. You are expected to be honest and ethical by completing all work yourself and indicating in your work which ideas and information were developed by you and which were taken from others. You cannot provide your assessment work to others. You are also expected to provide evidence of wide and critical reading, usually by using appropriate academic references.

In order to minimise incidents of academic fraud, this course may require that some of its assessment tasks, when submitted to Canvas, are electronically checked through Turnitin. This software allows for text comparisons to be made between your submitted assessment item and all other work to which Turnitin has access.

## 10.2. Assessment: Additional Requirements

### Eligibility for Supplementary Assessment

Your eligibility for supplementary assessment in a course is dependent of the following conditions applying:

- (a) The final mark is in the percentage range 47% to 49.4%; and
- (b) The course is graded using the Standard Grading scale

## 10.3. Assessment: Submission penalties

Late submissions may be penalised up to and including the following maximum percentage of the assessment task's identified value, with weekdays and weekends included in the calculation of days late:

- (a) One day: deduct 5%;
- (b) Two days: deduct 10%;
- (c) Three days: deduct 20%;
- (d) Four days: deduct 40%;
- (e) Five days: deduct 60%;
- (f) Six days: deduct 80%;
- (g) Seven days: A result of zero is awarded for the assessment task.

The following penalties will apply for a late submission for an online examination:

Less than 15 minutes: No penalty

From 15 minutes to 30 minutes: 20% penalty

More than 30 minutes: 100% penalty
