## 1. What is this course about?

### 1.1. Description

The USC postgraduate psychology programs are committed to maintaining the primacy of public safety in the delivery of the program within the education and placement environments. This subject employs a skills-training approach to extend your previous learning in psychology and psychotherapy, with an emphasis on strengthening effective psychotherapy skills, and a focus on the development of an effective working alliance with patients. You are also introduced to the importance of cultural factors within therapeutic work, the need to develop cultural sensitivity and awareness and skills for delivering effective transcultural therapy, with a special focus on working with Aboriginal and Torres Strait Island People and refugees. There will be an emphasis on PTSD and metacognitive therapy. Ethical issues will be addressed as they arise.

This will usually take the form of a detailed summary and reflection of the Directed Study Activities for the missed workshop.

Information regarding prescribed texts or other associated resources will be made available on the Canvas site prior to commencement of study.

## 9. How are risks managed in this course?

Health and safety risks for this course have been assessed as low. It is your responsibility to review course material, search online, discuss with lecturers and peers and understand the health and safety risks associated with your specific course of study and to familiarise yourself with the University's general health and safety principles by reviewing the [online induction training for students](#), and following the instructions of the University staff.

## 10. What administrative information is relevant to this course?

### 10.1. Assessment: Academic Integrity

Academic integrity is the ethical standard of university participation. It ensures that students graduate as a result of proving they are competent in their discipline. This is integral in maintaining the value of academic qualifications. Each industry has expectations and standards of the skills and knowledge within that discipline and these are reflected in assessment.

Academic integrity means that you do not engage in any activity that is considered to be academic fraud; including plagiarism, collusion or outsourcing any part of any assessment item to any other person. You are expected to be honest and ethical by completing all work yourself and indicating in your work which ideas and information were developed by you and which were taken from others. You cannot provide your assessment work to others. You are also expected to provide evidence of wide and critical reading, usually by using appropriate academic references.

In order to minimise incidents of academic fraud, this course may require that some of its assessment tasks, when submitted to Canvas, are electronically checked through Turnitin. This software allows for text comparisons to be made between your submitted assessment item and all other work to which Turnitin has access.

### 10.2. Assessment: Additional Requirements

Limited Graded Course:

This course will be graded as Pass in a Limited Grade Course (PU) or Fail in a Limited Grade Course (UF) as per clause 4.1.3 and 4.1.4 of the Grades and Grade Point Average (GPA) - Institutional Operating Policy of the USC.

In a course eligible to use Limited Grades, all assessment items in that course are marked on a Pass/Fail basis and all assessment tasks are required to be passed for a student to successfully complete the course. Supplementary assessment is not available in courses using Limited Grades.

### 10.3. Assessment: Submission penalties

All psychology courses (PSY course codes) have an online formal procedure for applying for an extension on assessment tasks. All extension applications for psychology courses should be made by completing the online form found on the Blackboard website for this course.
