

SEC601 Introduction to Cybersecurity

School: School of Science, Technology and Engineering

2026 | Trimester 2

UniSC Sunshine Coast
UniSC Adelaide

**BLENDED
LEARNING**

Most of your course is on campus but you may be able to do some components of this course online.

Online

ONLINE

You can do this course without coming onto campus, unless your program has specified a mandatory onsite requirement.

Please go to unisc.edu.au for up to date information on the teaching sessions and campuses where this course is usually offered.

1. What is this course about?

1.1. Description

In this online course you will be introduced to cybersecurity operations. You will develop the professional knowledge, qualities of thinking and digital collaboration skills needed to prepare you for future technical cyber security courses. You will explore the NIST Cybersecurity Framework and how cyber criminals target individuals and businesses, unlawfully seizing data and identities. You will also identify the dark markets where stolen data, identities and Intellectual Property are traded and how international law enforcement agencies operate to locate and prosecute cyber criminals.

1.2. How will this course be delivered?

ACTIVITY	HOURS	BEGINNING WEEK	FREQUENCY
BLENDED LEARNING			
Learning materials – Asynchronous Learning material	2hrs	Week 1	12 times
Tutorial/Workshop 1 – Synchronous on campus workshop	2hrs	Week 1	12 times
Seminar – On campus seminar	1hr	Week 1	2 times
ONLINE			
Learning materials – Asynchronous Learning material	2hrs	Week 1	12 times
Tutorial/Workshop 1 – Synchronous Zoom workshop	2hrs	Week 1	12 times
Seminar – Online seminar	1hr	Week 1	2 times

1.3. Course Topics

1. Introduction to Cybersecurity and Critical Thinking
2. Introduction to Cybersecurity
3. Networks and networking
4. Ports, protocols and services
5. The Internet
6. Network vulnerabilities
7. Technical cyber attacks
8. Non-technical & human factors attacks
9. Malicious software
10. Assessing Threats to the Network
11. Cybersecurity governance and Incident Response
12. Artificial Intelligence and Cybersecurity

1.4. Mature Content

Drug Use, Sex/Sexual references, Violence

2. What level is this course?

600 Level (Specialised)

Demonstrating a specialised body of knowledge and set of skills for professional practice or further learning. Advanced application of knowledge and skills in unfamiliar contexts.

3. What is the unit value of this course?

12 units

4. How does this course contribute to my learning?

COURSE LEARNING OUTCOMES	GRADUATE QUALITIES
On successful completion of this course, you should be able to...	Completing these tasks successfully will contribute to you becoming...
1 Describe basic network structures and technologies and how they can be exploited in an organisational context	Knowledgeable
2 Examine the range of technical and human factors (threats and vulnerabilities) that impact networks and the governance and compliance requirements.	Empowered
3 Communicate cyber-security incidents or potential incidents using technical and non-technical language and recommend timely and effective mitigation actions to a broad range of stakeholders.	Engaged
4 Evaluate evolving technologies and the potential cybersecurity implications of their deployment and implementation.	Creative and critical thinker

5. Am I eligible to enrol in this course?

Refer to the [UniSC Glossary of terms](#) for definitions of “pre-requisites, co-requisites and anti-requisites”.

5.1. Pre-requisites

Enrolled in Program SC509 or SC517 or BU708 or SC705 or MC007 or MC008

5.2. Co-requisites

Not applicable

5.3. Anti-requisites

Not applicable

5.4. Specific assumed prior knowledge and skills (where applicable)

Not applicable

5.5. Microcredential Information

Not applicable

6. How am I going to be assessed?

6.1. Grading Scale

Standard Grading (GRD)

High Distinction (HD), Distinction (DN), Credit (CR), Pass (PS), Fail (FL).

6.2. Details of early feedback on progress

Using marking rubrics, students will participate in continuous peer and self-assessment during tutorials

6.3. Assessment tasks

DELIVERY MODE	TASK NO.	ASSESSMENT PRODUCT	INDIVIDUAL OR GROUP	WEIGHTING %	WHAT IS THE DURATION / LENGTH?	WHEN SHOULD I SUBMIT?	WHERE SHOULD I SUBMIT IT?
All	1	Artefact - Technical and Scientific, and Written Piece	Individual	20%	1 hour	Week 5	Online Test (Quiz)
All	2	Case Study	Individual and Group	40%	2,000 words	Week 9	Online Assignment Submission with plagiarism check
All	3	Written Piece	Individual	40%	2,000 words with references	Week 12	Online Assignment Submission with plagiarism check

All - Assessment Task 1: Key concepts quiz

GOAL:	To evaluate understanding of critical thinking, analysis and report writing.		
PRODUCT:	Artefact - Technical and Scientific, and Written Piece		
AUTHORSHIP STATEMENT:			
FORMAT:	The evaluation will be comprised of a combination of multiple choice, fill in the blank and free text answers.		
CRITERIA:	No.		Learning Outcome assessed
	1	Demonstration of an understanding of critical thinking, analysis and report writing.	2 3
	2	Identification and rationalisation of the human and technical vulnerabilities exploited in cybercrime.	2
	3	Expression of creativity, thoughtfulness, and insightfulness based on an understanding of current information and computing technologies	1 4
GENERIC SKILLS:	Communication, Problem solving, Organisation, Applying technologies, Information literacy		

All - Assessment Task 2: Cybersecurity Analysis Report

GOAL:	This task will enable the student to identify and articulate technical and human factors attack strategies and methodologies in written format given a scenario of how a notional company operates.	
PRODUCT:	Case Study	
AUTHORSHIP STATEMENT:		
FORMAT:	Individual written report	
CRITERIA:	No.	Learning Outcome assessed
	1	Analysis of the digital cybersecurity environment 1
	2	Identification and explanation of technical and social engineering methodologies 1 2
	3	Evidence of digital collaboration 3
	4	Discussion of ethics as a function of cybersecurity policies and regulations 2
GENERIC SKILLS:	Communication, Problem solving, Applying technologies, Information literacy	

All - Assessment Task 3: Defence project plan

GOAL:	Students will design a defensive strategy for a notional company and present their plan	
PRODUCT:	Written Piece	
AUTHORSHIP STATEMENT:		
FORMAT:	Given a scenario describing the cybersecurity posture of a notional company, and building on the report they submitted in task 2, students will submit a written presentation to defend a protected network.	
CRITERIA:	No.	Learning Outcome assessed
	1	Identification and explanation of a range of technical and social engineering threats, their likelihood and impact on the case study organisation 2 4
	2	Application of control management framework 1
	3	Development of a business case for senior management 3 4
	4	Communication of results 3
	5	Make recommendations for a network security solution to be implemented by an organisation using the students training and expertise. 1 3 4
GENERIC SKILLS:	Communication, Problem solving, Organisation, Applying technologies, Information literacy	

7. Directed study hours

A 12-unit course will have total of 150 learning hours which will include directed study hours (including online if required), self-directed learning and completion of assessable tasks. Student workload is calculated at 12.5 learning hours per one unit.

8. What resources do I need to undertake this course?

Please note: Course information, including specific information of recommended readings, learning activities, resources, weekly readings, etc. are available on the course Canvas site– Please log in as soon as possible.

8.1. Prescribed text(s) or course reader

You need regular access to the resource(s) below. Many texts are available as ebooks through the [Library](#) at no additional cost.

REQUIRED?	AUTHOR	YEAR	TITLE	EDITION	PUBLISHER
Recommended	Graeme Edwards	2019	Cybercrime Investigators Handbook	n/a	John Wiley & Sons
Recommended	Thomas J. Holt,Adam M. Bossler,Kathryn C. Seigfried-Spellar	0	Cybercrime and Digital Forensics	n/a	n/a
Recommended	William Stallings,Lawrie Brown	2017	Computer Security	Fourth	Pearson Higher Education

8.2. Specific requirements

This is an online course; therefore, access to a computer and the internet for 10-12 hours per week is essential. Students should have a laptop or other computing device (PC) with full administrative rights allowing for the installation of software, browsers, and the ability to navigate to various sites, install virtual machine and penetration testing software. Tablets and mobile devices are NOT suitable for studying this course.

9. How are risks managed in this course?

Risk assessments have been performed for all field activities and a low level of health and safety risk exists. Some risks concerns may include working in an unknown environment as well as slip and trip hazards. It is your responsibility to review course material, search online, discuss with lecturers and peers and understand the health and safety risks associated with your specific course of study and to familiarise yourself with the University's general health and safety principles by reviewing the [online induction training for students](#), and following the instructions of the University staff.

10. What administrative information is relevant to this course?

10.1. Assessment: Academic Integrity

Academic integrity is the ethical standard of university participation. It ensures that students graduate as a result of proving they are competent in their discipline. This is integral in maintaining the value of academic qualifications. Each industry has expectations and standards of the skills and knowledge within that discipline and these are reflected in assessment.

Academic integrity means that you do not engage in any activity that is considered to be academic fraud; including plagiarism, collusion or outsourcing any part of any assessment item to any other person. You are expected to be honest and ethical by completing all work yourself and indicating in your work which ideas and information were developed by you and which were taken from others. You cannot provide your assessment work to others. You are also expected to provide evidence of wide and critical reading, usually by using appropriate academic references.

In order to minimise incidents of academic fraud, this course may require that some of its assessment tasks, when submitted to Canvas, are electronically checked through Turnitin. This software allows for text comparisons to be made between your submitted assessment item and all other work to which Turnitin has access.

10.2. Assessment: Additional Requirements

Eligibility for Supplementary Assessment

Your eligibility for supplementary assessment in a course is dependent of the following conditions applying:

- (a) The final mark is in the percentage range 47% to 49.4%; and
- (b) The course is graded using the Standard Grading scale

10.3. Assessment: Submission penalties

Late submissions may be penalised up to and including the following maximum percentage of the assessment task's identified value, with weekdays and weekends included in the calculation of days late:

- (a) One day: deduct 5%;
- (b) Two days: deduct 10%;
- (c) Three days: deduct 20%;
- (d) Four days: deduct 40%;
- (e) Five days: deduct 60%;
- (f) Six days: deduct 80%;
- (g) Seven days: A result of zero is awarded for the assessment task.

The following penalties will apply for a late submission for an online examination:

- Less than 15 minutes: No penalty
- From 15 minutes to 30 minutes: 20% penalty
- More than 30 minutes: 100% penalty

10.4. Links to relevant University policy and procedures

For more information on Academic Learning & Teaching categories including:

- Assessment: Courses and Coursework Programs
- Review of Assessment and Final Grades
- Supplementary Assessment
- Central Examinations
- Deferred Examinations
- Student Conduct
- Students with a Disability

For more information, visit <https://www.usc.edu.au/explore/policies-and-procedures#academic-learning-and-teaching>

10.5. Student Charter

UniSC is committed to excellence in teaching, research and engagement in an environment that is inclusive, inspiring, safe and respectful. The [Student Charter](#) sets out what students can expect from the University, and what in turn is expected of students, to achieve these outcomes.

10.6. General Enquiries

For course-specific questions, contact your teaching staff or Course Coordinator.

For other enquiries or to access support, please contact Student Central:
